PROFILE

Backend and full-stack developer with hands-on experience building transactional systems for emerging markets. Delivered a production-grade application integrating M-PESA payment infrastructure on Google Cloud and developed real-time computer vision pipelines optimized for low-resource environments. Holds an ISO/IEC 27001:2022 Lead Auditor certification and ISC2 Cybersecurity candidacy, combining software delivery with a security-first engineering mindset.

TECHNICAL SKILLS

Languages & Frameworks: Python, JavaScript (ES6+), React.js, PHP
Backend & APIs: REST API development, RESTful architecture, server-side validation, transaction logging
Databases: PostgreSQL (schema design, query optimization), Firebase
Cloud & DevOps: Google Cloud Platform (deployment & scaling), Git / GitHub
Security & Compliance: ISO/IEC 27001:2022 ISMS, risk assessment, audit methodology, access management
Applied AI: Computer Vision (OpenCV), feature-based image processing, predictive modelling fundamentals
Enterprise Systems: Microsoft 365, Microsoft Dynamics NAV, Dynamics 365, Google Workspace
Infrastructure: LAN configuration & diagnostics, PBX configuration, Arduino prototyping

WORK EXPERIENCE

ICT Officer Intern • Kenya Film Classification Board (KFCB) *Jan 2026 – Present*
Presidential Digital Talent Program (PDTP), ICT Authority

- Digitized and restructured 2+ manual compliance and booking workflows through requirements analysis and system redesign, improving audit traceability and reducing administrative processing time.
- Administered Google Workspace and Microsoft Dynamics NAV for 50+ staff, maintaining backend data consistency, user access controls, and system reliability.
- Contributed to public-sector digital transformation initiatives, translating operational constraints into structured technical requirements.

ICT Intern • Echo Network Africa Foundation *Mar 2025 – May 2025*
Nairobi

- Configured and maintained Microsoft 365 and Dynamics 365 systems supporting daily organizational operations.
- Standardized data entry and management workflows, reducing data inconsistencies, and improving downstream reporting accuracy by 98.5%.

ICT & Finance Intern • Communications Authority of Kenya *Jun 2024 – Sep 2024*
Nairobi

- Diagnosed and resolved network connectivity issues across LAN infrastructure serving 100+ workstations, minimizing downtime.
- Managed user access provisioning and account lifecycle within enterprise productivity systems, enforcing role-based access compliance.

- Provided hardware support and performed cable testing and signal validation across physical network layers.

TECHNICAL SKILLS

E-Receipts Web Application *React · PostgreSQL · Google Cloud · M-PESA API*

Designed and deployed a production-ready full-stack application enabling businesses to issue digital receipts with real-time M-PESA payment synchronization.

- Engineered RESTful payment confirmation APIs integrated with Safaricom's M-PESA Daraja platform, handling live transaction callbacks.
- Designed a normalized PostgreSQL schema ensuring persistent, auditable financial records across concurrent payment events.
- Implemented backend validation and transaction logging pipelines to enforce data integrity under high-concurrency scenarios.
- Deployed and scaled the application on Google Cloud, achieving stable uptime under test load conditions.

Computer Vision Object Detection App *Python · OpenCV*

Built a real-time object detection pipeline for image-based monitoring, optimized for low-resource hardware environments.

- Developed a frame preprocessing and bounding-box classification pipeline achieving sub-100ms detection latency per frame.
- Tuned model and runtime parameters to sustain consistent frame rates on resource-constrained devices, broadening deployment viability.

EDUCATION & CERTIFICATIONS

Bachelor of Technology in Information Technology *Nov 2024*

Technical University of Kenya

ISO/IEC 27001:2022 Lead Auditor *Jul 2025 – Jul 2028*

Mastermind Assurance

ISC2 Cybersecurity Candidate (CC) *Jul 2025 – Jul 2026*

International Information System Security Certification Consortium (ISC2)
